

STATEMENT ON DIVERSITY AND INCLUSION

The UC Davis Department of Physics is fully committed to and supportive of the University of California Diversity Statement and the University of California, Davis, Principles of Community.

As a community, we acknowledge the richness of commonalities and differences we share, the intrinsic worth of all who work and study here, and that physics education is enhanced by investigation of and reflection upon multiple perspectives. We are committed to ensuring the diversity of our campus and will do whatever we can, legally and appropriately, to preserve and expand the diverse nature of our community. We aspire to cultivate an environment that welcomes and supports diversity, and one that affirms equal educational opportunities for all who teach and learn here.

Anyone who witnesses improper or disrespectful treatment of our undergraduate students, graduate students, researchers, faculty or staff is encouraged to bring it to the Chair's attention, or contact the

- UC Davis Office of Campus Community Relations (occr.ucdavis.edu), or
- Harassment & Discrimination Assistance and Prevention Program (hdapp.ucdavis.edu), or
- Campus Title IX Officer (compliance.ucdavis.edu)

Robert Svoboda
Chair, Department of Physics
